MARTHA MCKENZIE

MCK-1

CLOTHING HANGER HOLDER

ABSTRACT OF THE DISCLOSURE

First and second rods extend from spaced points on an open frame. The rods support a plurality of hangers situated in parallel planes. When the frame is mounted on a wall such that the rods extend horizontally, the hangers are retained on the rods by upwardly bent end sections. A third rod may be provided to engage the hanger near the point where the hook is attached. In one preferred embodiment, the upwardly bent end sections of the first and second rods are connected by an arcuate section and the third rod is joined to the arcuate section. A cover enclosing the hangers is employed in another preferred embodiment.
